

MUHAMMAD BAARRUN BIN JAMAL

Full-Stack Developer | MERN & Python | Flutter Mobile Development

Karachi, Pakistan | +92 318 8568037 | mbaarrun2008@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-stack developer and AI/CS undergraduate (UIT, Karachi) with a track record of shipping production-grade applications end to end — from database schema to deployed UI. Core strength in the MERN stack (MongoDB, Express, React, Node.js) with additional experience in Laravel/PHP, ASP.NET MVC, Python, and Flutter mobile development. Built and led delivery on multiple award-winning AI-powered web applications, including a national-level competition win and selection to represent Pakistan internationally. Comfortable owning a project independently as a freelancer or leading cross-functional teams from planning through launch.

TECHNICAL SKILLS

Languages: JavaScript, Python, PHP, C#, Dart, SQL, HTML5, CSS3
Frontend: React.js, Bootstrap, Responsive/Dark-theme UI Design, Recharts
Backend: Node.js, Express.js, Laravel, ASP.NET MVC, REST APIs, JWT Authentication, Passport.js (OAuth)
Mobile: Flutter, Dart, Cross-platform App Development
Databases: MongoDB (native driver), MySQL, SQL Server, Schema Design & Query Optimization
AI / Automation: Groq LLM API integration, Speech Recognition (Vosk), Wake-word Detection, Python Automation Scripts
Tools & Practices: Git/GitHub, Postman, Cron Jobs, Multer, Nodemailer, PDF/Word Report Generation, Unit Testing, Agile Team Leadership

KEY PROJECTS

- Forge — Full-Stack Fitness Tracking Platform (MERN):** Built a production-scale fitness application featuring JWT auth with email verification, workout & nutrition logging (USDA FoodData Central API), subscription plans with admin approval and auto-generated training plans, cron-driven automation, and PDF/Word progress reports emailed to users. Designed a consistent dark-themed UI with Recharts analytics dashboards.
- Jarvis — Personal AI Voice Assistant (Python):** Developed a desktop AI assistant with wake-word activation (openWakeWord), offline speech-to-text (Vosk), Groq LLM-powered responses, text-to-speech output, a clipboard-based coding helper, system tray integration, and full Windows startup automation.
- Nexus — Competitive Coding Platform Authentication (MERN):** Implemented secure, multi-provider authentication (email/password, Google OAuth, GitHub OAuth) using Passport.js with stateless JWT sessions and a unified account-linking strategy across providers.
- CodeX Arena & CodeForge Arena — Gaming-Style Developer Platforms:** Designed cyberpunk-inspired competitive coding/gaming lobby interfaces featuring animated canvas backgrounds, live stats, tournament countdowns, leaderboards, and avatar rendering systems.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — *Freelance / Independent Projects* — Karachi, Pakistan 2024 - Present

- Designed and built 2 Laravel web applications with RESTful APIs, role-based authentication, and normalized MySQL schemas.
- Developed an ASP.NET MVC application with SQL Server integration and secure authentication flows.
- Delivered multiple full-stack MERN applications (Node.js/Express, MongoDB, React) with responsive UIs and JWT-based authentication, including a fitness-tracking platform used for academic demonstration.
- Built a Python-based AI voice assistant integrating offline speech recognition, LLM APIs, and system-level automation.
- Optimized backend performance through query tuning, caching, and Git-based development workflows with unit tests.
- Led cross-functional teams of 2–4 members across 4 separate projects, managing planning, task delegation, and delivery from kickoff to launch.

ACHIEVEMENTS & AWARDS

- 1st Place — AI Web Development & Content Generation Competition:** Designed and developed a fully functional AI-powered web application that won first place against senior competitors.

- **Aptech Vision 2025 — Selected Representative:** Built and presented a career-counselling AI application at Aptech's flagship annual showcase, selected from institute-wide submissions.
- **TechWiz — International Web Development Competition:** Represented Pakistan in an international web development competition, competing against teams from multiple countries.
- **Team Lead — 4 Project Teams:** Led cross-functional development teams across 4 separate projects, managing planning, task delegation, and delivery from kickoff to launch.

EDUCATION

BS, Computer Science (Artificial Intelligence) — *UIT University — Karachi, Pakistan*

2024 - Present

ACCP AI — Advanced Career Certificate Programme — *Aptech, Karachi*

Completed

Selected as institute representative for Aptech Vision 2025 flagship showcase; built award-winning AI web application during the programme.

ADDITIONAL INFORMATION

Languages: English (Fluent), Urdu (Native)

Availability: Open to freelance contracts, part-time roles, and internships alongside studies

Work Style: Comfortable owning projects solo end-to-end or leading small teams; clear async communication and milestone-based delivery
